

TACPA Workforce Credit

We suggest that TACPA be updated to include an additional \$50,000 for workforce preferences. For your information, there are 2 separate preferences in TACPA. Worksite and Workforce. These are totally separate issues. One has to do with the worksite and one has to do with the workforce. You cannot have the workforce without first having the worksite.

Since this is a credit, there is no additional cost to the state for allowing this credit.
